

DLR is over the moon with their SAP HCM reporting

EPI-USE Labs deploys Query Manager to streamline SAP HCM reporting for the German Aerospace Center, DLR.

“ From the very first demonstration of EPI-USE Labs' Query Manager, we recognised its immense potential. We had found the solution to our HR reporting challenges.

Max Köstenberger, Head of Personnel Information Management, DLR

Seamless integration of different data sources for meaningful HR reports

Simple steps led to up-to-date SAP compatible reports

Number and efficiency of HR reports increased significantly

Automation reduced manual errors and improved report quality

About DLR

The German Aerospace Center (Deutsches Zentrum für Luft- und Raumfahrt e.V., abbreviated DLR) is the national centre for aerospace, energy and transportation research, founded in 1969. DLR and its predecessor organisations have a history spanning over 115 years, including one of the world's first institutions dedicated to aeronautics research.

As a sovereign agency performing critical spaceflight tasks for the Federal Government, DLR develops and controls the national space programme, and represents the interests of Germany in space-related international bodies. Employing over 10,000 people, DLR has been at the forefront of research and development in aeronautics, space, energy, transport, security and digitalization for over a century.

The challenge: time-consuming HR reports

Given increasingly demanding and more complex reporting requirements, including time-consuming manual processing of SAP ad hoc queries, DLR approached EPI-USE Labs to refine their SAP HCM reporting framework. Their plan was to deal with the increasing complexity more easily and efficiently than in the past, while simultaneously improving data integrity.

Query Manager solves complex SAP HCM reporting challenges for DLR

DLR found EPI-USE Labs' Query Manager to be the solution to their complex HCM reporting challenges. The software seamlessly integrates data from multiple sources into meaningful reports. Manual errors have been minimised through automation. Simple steps produce up-to-date HR reports that are compatible with SAP, with increased flexibility bringing efficiency to DLR.

Improved HR reporting at DLR

Query Manager has dramatically simplified and speeded up DLR's reporting processes, while improving reporting precision. Much manual effort has been eliminated, and reporting that previously took hours is now produced in an instant, with better quality to boot. Diverse data sources are being drawn upon, producing coherent output with relative ease.

About EPI-USE Labs

As a global software solutions and managed services company, EPI-USE Labs helps you to maximise the performance, management and security of your SAP® and SAP SuccessFactors® systems. Our clients tell us every day how we have transformed their business operations.
