

A HEALTHY REFRESH SCHEDULE

INTRO

If we consider a typical 3-tier SAP landscape - Development, Quality and Production running BW, CRM & ECC Systems (with Payroll) the following general refresh schedule provides reliable testing data when needed for most industries.

SCHEDULE

MONTHLY

- HCM (HR/Payroll)
Data only in-place refresh

QUARTERLY

- BW, CRM, ECC Quality Client
refresh with 6-month time-slice,
source side scrambled

HALF YEARLY

- CRM, ECC Development Unit
Testing client refresh with
3-month time slice, source
side scrambled
- On-Demand Object Copy -
Selected object level copy to
resolve Production system support
issues (ie Customer, Vendor,
Employee etc with related data)

TAKE ACTION TODAY!

“The average organisation loses \$8.2 million annually through poor Data Quality”
- Gartner
